

# EncircleRx Weight Loss: Weight Management Program

## Frequently Asked Questions

To further support your health and well-being, we're offering **EncircleRx<sup>SM</sup>** – a new weight management program that includes coverage for select prescription weight management medications

### What medications are included?

Wegovy<sup>®</sup>, Zepbound<sup>TM</sup> and Saxenda<sup>®<sup>1</sup></sup> are medications approved by the U.S. Food and Drug Administration (FDA) for weight management. These medications, along with healthier behaviors, including a reduced-calorie diet and increased physical activity, help address chronic weight management issues.

### What are the coverage requirements for a weight loss medication?

For a medication to be covered, you must:

1. Join and participate in the Omada<sup>®</sup> online lifestyle modification program, which is available at no extra cost to you;<sup>2</sup> and
2. Have a body mass index (BMI) of 32 or higher – **or** a BMI of 27 or higher, *along with* two weight-related health issues.
3. Engage in a trial of behavioral modification and dietary restriction for at least 3 months prior to taking the medication.

### What weight-related health issues are included in the requirements for coverage of a weight loss medication?

\*If your BMI is 32 or higher, you can qualify for coverage in EncircleRx.

\*If your BMI is 27 to 31 **and** you have two weight-related issues, such as those listed below, you can qualify for coverage in EncircleRx.

- |  |  |
|--|--|
| <ul style="list-style-type: none"><li>• Arthritis of the knee</li><li>• Asthma</li><li>• Chronic obstructive pulmonary disease</li><li>• Coronary artery disease</li><li>• Heart disease</li><li>• High blood pressure</li></ul> | <ul style="list-style-type: none"><li>• High cholesterol</li><li>• Non-alcoholic fatty liver disease</li><li>• Obstructive sleep apnea</li><li>• Polycystic ovarian syndrome</li><li>• Type 2 diabetes</li></ul> |
|--|--|

\*You will also need to enroll in the Omada lifestyle modification program.

\* If you are currently taking this medication, the BMI level provided from your prescriber during the coverage review process will be the measurement before you started taking the medication.

## How do I know what my BMI is?

BMI, or body mass index, is a measure of your body composition based on your height and weight.

Your doctor can tell you what your BMI is, or you can use an [online calculator](#) to find out.<sup>3</sup>

## What's Omada?

Omada is a virtual chronic care provider partnered with Express Scripts. They are experts in weight loss and obesity disease management, allowing you to work closely with a health coach. They offer support and virtual programs that give you the tools and resources to get healthy and help manage weight, lower blood pressure and/or control diabetes. Omada will help you build healthy routines around what you like to do and where you need the most support. You will work with a virtual care team who will help you reach your goals through one-on-one health coaching, specialist support and smart devices – at no extra cost to you. You can join Omada if you meet certain eligibility requirements and are prescribed a medication for weight loss.

## How do I get started with Omada?

Based on your medication or medical history, Omada may have already reached out to you. If you have this communication in your email inbox, you can follow the link and the corresponding directions, or if the invite was mailed to you, enroll in Omada at [omadahealth.com/esi](http://omadahealth.com/esi). It is important to check your junk mail setting to make sure you can receive Omada communications.

Alternatively, your Omada enrollment link are available on the Express Scripts portal at [omadahealth.com/esi](http://omadahealth.com/esi). If you do not have a login, you can register by clicking the Register Now button on the login screen or by visiting [express-scripts.com/healthsolutions](http://express-scripts.com/healthsolutions). Once logged in, please select the Health Solutions Tab at the top. Here you will find information on the Omada program(s) available to you as well as your enrollment link.

**Omada for Prevention**

Select this Omada program and use this access code if you are overweight (based on body mass index or BMI), have pre-diabetes, or are at risk of diabetes (have a history of gestational diabetes, a family history of diabetes, and/or high cholesterol). Omada for Prevention is a personalized weight management and healthy living program that works with you to provide one-on-one coaching, a smart scale, a custom health plan dedicated to your goals and lifestyle, and a peer support group. This program is provided as a feature of your plan at no cost to you.

If you have trouble enrolling, you can reach out to Omada at [support@omadahealth.com](mailto:support@omadahealth.com).

### I brought my weight loss prescription to my pharmacy, but they were unable to fill the medication. What is going on?

Being able to receive a prescription for a weight loss medication is dependent on two things: active enrollment and/or engagement with Omada and an active prior authorization. If you are not enrolled in Omada, directions for enrollment will be sent to you shortly after your pharmacy first receives your prescription. If you are enrolled, it is important that you maintain active participation with Omada.

**Prior to receiving a prescription for a weight loss medication, I was already enrolled in Omada. Do I have to start over or re-enroll?**

No, you do not need to re-enroll in Omada. If you are already enjoying the benefits of Omada, you need to maintain active engagement. More information on active engagement requirements is provided below. If you currently do not have a scale, Omada will provide one when you start a weight loss medication.

**What does “active engagement” with Omada mean?**

Active engagement is defined as four weigh-ins and four app engagements per month. App engagements are not restrictive or specifically defined because everyone's journey is unique and different. An engagement can be a completed lesson, a conversation with your health coach, meal tracking, adding to a peer group conversation, completing an exercise goal or many of the other activities offered by Omada. A weigh-in simply requires stepping on your scale and allowing it to record your weight for the day. If you record your drug under the Medications List section of the app, you will be able to track how many Omada activities and weigh-ins have been completed.

**Is there a way to track my active engagements through the Omada app?**

Yes! In order to see the progress towards Omada engagement requirements (i.e., four weigh-ins and four app engagements monthly), you will need to self-report your GLP-1 usage in the Omada app under your Medications List. For step-by-step instructions, please use [this resource](#) via the Omada Help Center.

**Once I am enrolled in Omada, what happens next?**

Your coach will reach out to introduce themselves, and you will receive your scale and any additional equipment necessary based on your initial enrollment responses. For the first 30 days, simply enrolling is enough to meet the engagement requirements while you wait for your equipment.

Additionally, your doctor will be contacted by your pharmacy to complete a coverage review for your weight loss medication. The requirements of this process are described above. Everything the prescriber needs will be provided to them, and information provided by the doctor will be evaluated as soon as it is received. You may also help initiate

this process by asking your doctor to visit the EviCore by Evernorth portal at [evicore.com](http://evicore.com) or call Express Scripts at 800.417.1764 to arrange for a review. If the doctor is unable to provide the required documentation, your prescription may be denied. If this occurs, the full cost of the medication would fall to you.

Once both requirements are met, your medication will be available to be filled at your pharmacy.

**I was already on weight loss medication therapy. What does this all mean for me?**

If you were already on a weight loss medication, you will be required to enroll in Omada, and your coverage review will be re-evaluated based on the updated criteria.

**If I am approved, are there limits to how long I can be on my weight loss medication? If I stop my weight loss medication, what support is provided?**

No, currently there are no limits to how long you can be on your weight loss medication. If your medication is discontinued for any reason, you can still participate in the Omada program. Omada can provide you with the tools and education to make this transition a successful one and can continue to provide reinforcement and coaching — there is no need to stop using Omada even if you are no longer taking your weight loss medication.

**If I have additional questions, who can I reach out to?**

If you have additional questions specifically about the Omada program, you can contact Omada via their email [support@omadahealth.com](mailto:support@omadahealth.com) or communicate directly with them via the app if you are already enrolled.

If you have additional questions about the EncircleRx program or your coverage review, you can reach Express Scripts via the number provided on your prescription ID card.
