

Employee Name	Position Title
Start Date	College/Division
Review Date	Manager Name

Performance & Development is a cyclical process. This form has been developed to help managers and employees continuously evaluate performance throughout the year. Click "Jump To" underneath each section of the timeline to be brought to the corresponding section of the form. You can save your progress and return to the form throughout the year. If you have any questions about the Performance & Development process, please contact your HR Business Partner.

#### Performance & Development Timeline:

While the visual gives you an overall sense of what happens when, it's important to review performance and solicit/provide feedback regularly throughout the year.

As always, check with your local division/ college for any internal deadlines.

### **Setting Goals:**

Complete this section before or at the start of the fiscal year (**typically July/ August**). Establish 3-5 goals. Describe the goal and its relation to the <u>university mission</u> and any divisional/ college goals. Be sure to outline how each goal will be measured and its achievement verified. Include expected outcomes, quality measures, dates, timelines and/or descriptive narrative. A minimum of one (1) goal should reflect plans for personal growth and development. *See our course on Performance & Development for additional resources*

### **Mid-Year Review:**

Complete this section midway through the performance and development process (**typically**, **December/January**). Review progress toward goals, key job responsibilities, and skills and competencies, and performance to date. Document the discussion here and if goals or priorities change, revise accordingly. Be sure to capture the date it occurred. **See our course on Performance & Development for additional resources** 

MID-YEAR CHECK-IN (December/January)		
Mid-Year Review		
Date		

### **Year-End Accomplishments:**

This section is used to evaluate performance over the past year. Accomplishments and performance are measured in three areas: achievement of goals; effective use of skills and competencies; and performance overall.

Outline results achieved and include any comments, feedback and examples of good performance, significant achievements, skills applied or in need of improvement here. Managers assign <u>ratings</u> for each goal, the job performance, and the individual skills using the metrics and job expectations identified and discussed at the start of the cycle or the project. <u>See our course on Performance & Development for additional resources</u>
